Important Safety Information

Warnings
Retinoids may cause fetal harm when administered to a pregnant woman. Do not use Tazorac® Cream and Gel 0.1% if you are pregnant, attempting to become pregnant, or at high risk of pregnancy. Consult your physician for adequate birth-control measures if you are a female of child-bearing potential.

Please see additional Important Safety Information inside.
IT’S EASY TO USE TAZORAC®
(tazarotene) Cream and Gel 0.1%

3 SIMPLE STEPS TO CLEARER SKIN

1. Cleanse
Begin by gently washing your face with warm (not hot) water and a mild cleanser. Avoid any astringents or alcohol-based products. Then, gently pat your face dry.

2. Moisturize
Many dermatologists recommend using a moisturizer before applying TAZORAC®. Gently and completely rub in your moisturizer before applying TAZORAC®.

3. Apply TAZORAC®
Spread one pea-sized drop, once a day before going to bed, over the areas of your face where you have acne lesions. Avoid eyes, eyelids, and mouth. Wash your hands after applying TAZORAC®.

Important Safety Information (continued)

Warnings (continued)
To help assure that you are not pregnant when you begin use, take a pregnancy test within 2 weeks prior to beginning to use TAZORAC® Cream or Gel 0.1% and/or begin taking TAZORAC® Cream or Gel 0.1% during a normal menstrual period.

TAZORAC® Cream and Gel 0.1% should not be used if you are allergic to any of its ingredients. Please see complete Information for Patients for a list of ingredients.

Please see additional Important Safety Information on following page.
A LITTLE GOES A LONG WAY

One sample tube should last 4 weeks

Important Safety Information (continued)

Precautions

TAZORAC® (tazarotene) Cream and Gel 0.1% should not be used if you are also taking other drugs that increase your sensitivity to sunlight (eg, thiazides, tetracyclines, fluoroquinolones, phenothiazines, sulfonamides). Inform your physician if you are taking any other medications.

Use protective clothing and sunscreens of at least SPF 15 during the day when using TAZORAC® Cream and Gel 0.1%.

Please see additional Important Safety Information on following page.
CLEARER SKIN IN WEEKS

Your skin should start to improve after 4 weeks. During the first few weeks of treatment, even when the medicine is working, it may appear that your skin is getting worse. After that, you should be seeing improvements.

Protect your skin. Always use sunscreen and cover your face in cold, windy weather.

Be nice. Don’t scrub, pick, or pop pimples.

Go all 12 weeks. Studies on TAZORAC® (tazarotene) Cream and Gel 0.1% showed results on some people at that point. Give the medicine time to work.

If you have any concerns during your treatment with TAZORAC®, contact your doctor.

Additional instructions from your doctor
