TAZORAC® (tazarotene) Cream 0.1% is used to treat acne.

TAZORAC® (tazarotene) Gel 0.1% is used in the treatment of mild to moderately severe facial acne.

IMPORTANT SAFETY INFORMATION
WARNINGS

Retinoids may cause fetal harm when administered to a pregnant woman.

Please see additional Important Safety Information on the following panel.
WARNINGS (continued)
Do not use TAZORAC® (tazarotene) Cream and Gel 0.1% if you are pregnant, attempting to become pregnant or at high risk of pregnancy. Consult your physician for adequate birth control measures if you are a female of child-bearing potential.

Please see additional Important Safety Information on the following panel.

CLEARER SKIN IN 4 WEEKS

Actual, unretouched photos of a TAZORAC® patient. Actual results may vary. Clearing can start at 4 weeks; full results can be seen at 12 weeks.

IMPORTANT SAFETY INFORMATION (continued)

WARNINGS (continued)

To help assure that you are not pregnant when you begin use, take a pregnancy test within 2 weeks prior to beginning to use TAZORAC® (tazarotene) Cream or Gel 0.1% and/or begin taking TAZORAC® Cream or Gel during a normal menstrual period.

Please see additional Important Safety Information on the following panel.
Give TAZORAC® time to work

Clearer skin won’t happen overnight
During the first few weeks of treatment, your skin may look like it’s irritated. Don’t get discouraged—that doesn’t mean TAZORAC® isn’t working. You should start seeing improvement at 4 weeks.¹²

Don’t forget!

Moisturize and protect your skin
Use a moisturizer before applying TAZORAC® (tazarotene) Cream or Gel 0.1% — and don’t worry, it won’t decrease the effectiveness.⁶ It’s also important to use sunscreen daily of at least SPF 15.⁴⁵

A little bit goes a long way
Just one pea-sized drop of TAZORAC® is all you need each time—using more won’t increase the effectiveness or speed up results, and it may lead to irritation.⁴⁵

IMPORTANT SAFETY INFORMATION (continued)

WARNINGS (continued)
TAZORAC® (tazarotene) Cream and Gel 0.1% should not be used if you are allergic to any of its ingredients. Please see complete Information for Patients for a list of ingredients.

PRECAUTIONS
TAZORAC® (tazarotene) Cream and Gel 0.1% should not be used if you are also taking other drugs that increase your sensitivity to sunlight (e.g., thiazides, tetracyclines, fluoroquinolones, phenothiazines, sulfonamides).

Please see additional Important Safety Information on the following panel.
3 simple steps to clearer skin

1. **Step 1. Cleanse**
   Gently wash face with warm water and a mild cleanser, then pat skin dry.

2. **Step 2. Moisturize**
   Apply a moisturizer before TAZORAC® (tazarotene) Cream or Gel 0.1%.

3. **Step 3. Apply TAZORAC®**
   Spread one pea-sized drop, once a day in the evening, over the affected areas of the face. **Avoid eyes, eyelids, and mouth.** Wash hands after applying TAZORAC® (tazarotene) Cream or Gel 0.1%.

---

**IMPORTANT SAFETY INFORMATION (continued)**

**PRECAUTIONS (continued)**

Inform your physician if you are taking any other medications. Use protective clothing and sunscreens of at least SPF 15 during the day when using TAZORAC® (tazarotene) Cream and Gel 0.1%. Please see additional Important Safety Information on the following panel.

Do not use TAZORAC® (tazarotene) Cream and Gel 0.1% if you have sunburn, eczema, or other continuing skin condition. Use TAZORAC® Cream and Gel with caution if you are using other topical products that might dry or irritate the skin. Please see additional Important Safety Information on the back panel.
IMPORTANT SAFETY INFORMATION (continued)

ADVERSE REACTIONS

The most common side effects of TAZORAC® (tazarotene) Cream and Gel 0.1% are peeling, burning/stinging, dry skin, red skin, and itching.
